Prepared By
Sourav Ghosh

Product Overview & Market Opportunity

About Blinkit

- India's leading Quick Commerce platform
- Delivers groceries, essentials & food in 10–20 minutes
- Operates across 30+ cities
- Millions of monthly active users
- Expanding into food delivery (Bistro) and high-frequency purchases

Quick Commerce Market

Indian Quick Commerce is growing rapidly due to:

- Urban lifestyle & convenience
- Higher smartphone penetration
- Instant delivery expectations
- Frequent repeat purchases
- Rising demand for ready-to-eat meals

Business Challenge

Customer Retention: 45% | Average Order Value: ₹460

Competitor (Zepto) AOV: ₹607

Goal: Increase customer retention and average order value by improving product discovery, engagement, and purchase experience.

User Personas & Current User Journey

Understanding Our Users

Who shops on Blinkit and what challenges do they face?

Persona 1 – Busy Professional

- Age: 24–35
- Needs: Fast delivery after work
- Orders: 3–4 times/week
- Pain Point: Can't quickly find what they need

Persona 2 – Family Shopper

- Age: 30–45
- Needs: Weekly grocery shopping
- Orders: 2–3 large orders/month
- Pain Point: Misses complementary products, resulting in multiple orders

Persona 3 – Student

- Age: 18–25
- Needs: Instant meals
- Orders: Frequently but small cart values
- Pain Point: Price-sensitive and often abandons the cart

Key Insight-Users shop quickly but discover less, resulting in lower AOV and repeat purchases.

User Personas & Current User Journey

blinkit
India's Last Minute App

Understanding Our Users

1. Busy Professional

- Age: 24–35
- Needs: Fast delivery after work
- Orders: 3–4 times/week
- Pain Point: Can't quickly find what they need

2. Family Shopper

- Age: 30–45
- Needs: Weekly grocery shopping
- Orders: 2–3 large orders/month
- Pain Point: Misses complementary products, resulting in multiple orders

3. Student

- Age: 18–25
- Needs: Snacks, beverages & instant meals
- Orders: Frequently but with small cart values
- Pain Point: Price-sensitive and often abandons the cart

Current User Journey

1. Open App

- Generic homepage for all users

2. Browse / Search

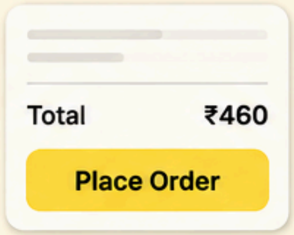

- Too many categories, difficult to discover relevant products

3. Add to Cart

- Limited bundle or cross-sell suggestions

4. Checkout

- No incentives to increase basket value

5. Delivery

- Minimal post-purchase engagement or reorder prompts

Key Insight | While Blinkit excels at fast delivery, users often struggle to discover relevant products and receive limited incentives to build larger carts or return for future purchases.

Problem Statement & Research Insights

Why are retention and AOV not growing?

Current Challenges

Customer Retention

- Plateaued at 45%
- Many users don't become repeat customers

Average Order Value

- Blinkit: ₹460
- Zepto: ₹607

Product Discovery

- Users struggle to discover relevant products
- Low cross-selling opportunities

Primary Research

Users want:

- Personalized recommendations
- Faster product discovery
- Easier reordering
- Better combo offers

Secondary Research

- Quick commerce users value speed + convenience
- Personalized recommendations increase basket size
- Bundles improve Average Order Value
- Loyalty features improve repeat purchases

Blinkit delivers orders quickly but misses opportunities to personalize shopping,improve product discovery, and encourage larger, repeat purchases—leading to lower retention and Average Order Value compared to competitors.

Competition Benchmarking

How Blinkit compares with leading quick commerce platforms

Loyalty & Rewards	⚠ Limited	✓ Strong	✓ Good	⚠ Limited

✓ Strong ⚠ Moderate ✗ Missing

Key Competitive Insights

Zepto

- Strong AI-powered product recommendations
- Effective bundle suggestions
- Higher Average Order Value (₹607)
- Better repeat engagement

Swiggy Instamart

- Strong ecosystem integration
- Relevant product recommendations
- Better loyalty & offers
- Higher customer engagement

Blinkit Opportunity

- AI-powered personalized feed
- Smarter combo & bundle engine
- Dynamic cart recommendations
- Enhanced loyalty & rewards

Key Takeaway

Blinkit leads in delivery speed but has opportunities to strengthen personalization, smart bundling, and loyalty features to improve customer retention and Average Order Value.

Opportunity Identification & Prioritization

Prioritizing high-impact initiatives to improve Retention & AOV

Opportunity 1: Personalized Product Discovery

- AI-powered personalized home feed
- Smart product recommendations based on purchase history
- Personalized search suggestions

Opportunity 2: Increase Basket Size

- Frequently Bought Together recommendations
- Smart combo & meal bundles
- Dynamic free-delivery progress bar

Opportunity 3: Improve Purchase Experience

- One-tap reorder
- Saved shopping carts
- Faster, frictionless checkout

Opportunity 4: Drive Repeat Purchases

- Pantry refill reminders
- Personalized push notifications
- Loyalty rewards & shopping streaks

AI Personalized Feed (P1)

- **Personalized recommendations**
- **Better product discovery**

Smart Bundles (P1)

- **Combo offers & FBT**
- **Increases AOV**

Free Delivery Bar (P2)

- **Shows amount to unlock free delivery**
- **Encourages bigger carts**

Pantry Refill (P3)

- **Reorder reminders**
- **Improves retention**

Loyalty Rewards (P3)

- **Points & exclusive rewards**
- **Boosts repeat purchases**

Proposed Solution: Personalized Shopping Experience

AI-powered features to improve discovery, engagement, and basket size.

AI Personalized Home Feed

- Personalized product recommendations
- Recently viewed & frequently bought items
- Trending products based on user preferences

Smart Bundles

- Frequently Bought Together suggestions
- Meal combo recommendations
- Festival & seasonal bundles

Smart Cart Experience

- Free delivery progress bar
- AI-powered add-on suggestions
- Save for Later option

Loyalty & Reorder

- One-tap reorder
- Pantry refill reminders
- Reward points for repeat purchases

Expected Impact

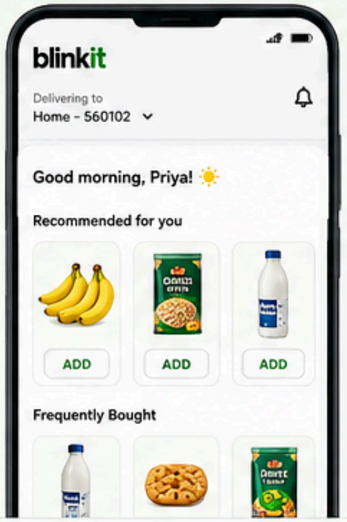

- Higher Product Discovery
- Increased Average Order Value
- More Repeat Purchases
- Better Customer Experience

Revised User Journey

Enhanced shopping experience with AI-powered personalization

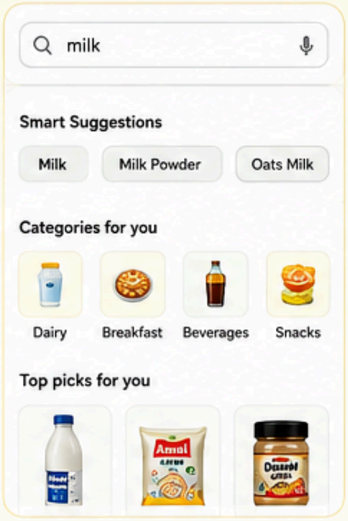

blinkit
India's Last Minute App

1 OPEN APP

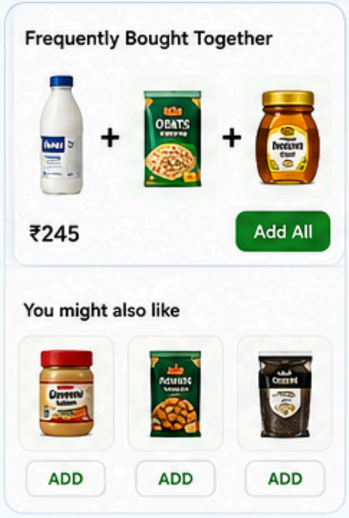

- Personalized home feed
- Recommended products based on your preferences

2 BROWSE & SEARCH

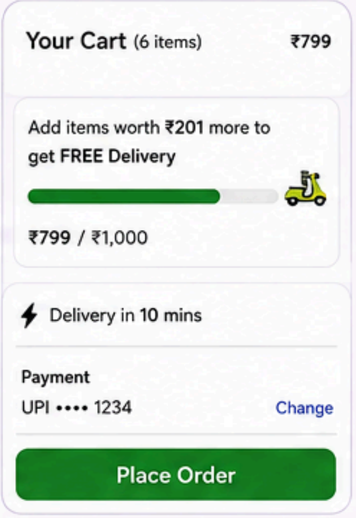

- AI-powered search
- Smart category suggestions

3 ADD TO CART

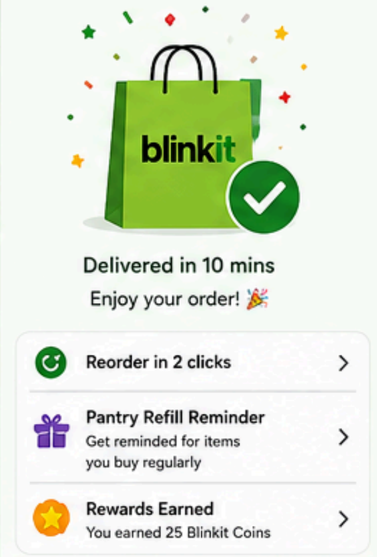

- Frequently Bought Together
- Smart bundle recommendations

4 CHECKOUT

- Free delivery progress bar
- One-click checkout

5 ORDER DELIVERED

- Reorder reminders
- Loyalty rewards
- Personalized offers

KEY OUTCOME

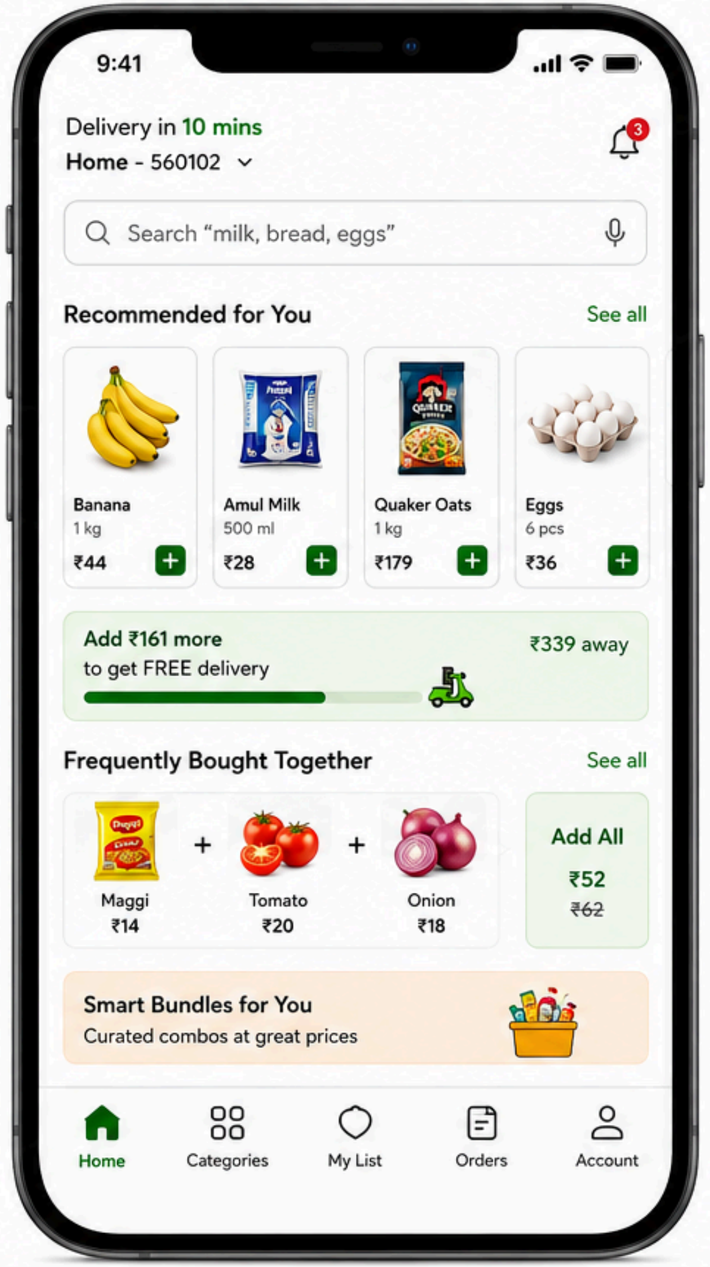

- Higher Product Discovery
- Increased Average Order Value
- More Repeat Purchases
- Better Customer Experience

A personalized shopping journey that improves product discovery, increases basket size, and encourages repeat purchases.

Wireframe – Home Screen (Redesigned)

Personalized, relevant & curated experience for every user

blinkit
India's Last Minute App

Personalized Recommendations

AI-powered product recommendations based on your preferences and history.

Free Delivery Progress Bar

Shows amount remaining to unlock FREE delivery and encourages higher cart value.

Frequently Bought Together

Smart cross-sell suggestions to increase basket size.

Smart Bundles

Curated combos & meal kits designed for your needs.

Trending Near You

Popular and trending products in your area.

Key Benefits

Better Discovery
Relevant products at your fingertips

Higher AOV
Bundles and cross-sell drive bigger baskets

More Repeat Orders
Personalization leads to higher engagement

Improved Experience
Faster, easier and more delightful shopping

What's New?

Personalized Home Feed | Smart Bundles | Delivery Progress Bar | Cross-sell Recommendations | Clean & Simplified UI

Wireframe – Product & Cart Experience

Optimizing checkout to increase Average Order Value (AOV)

Product Page Improvements

- AI-powered product recommendations
- Frequently Bought Together section
- Smart combo & meal bundles
- Similar product suggestions

Cart Experience Enhancements

- Free delivery progress bar
- One-click bundle addition
- Save for Later option
- Estimated savings display

Key Features

- Cross-sell recommendations
- Dynamic cart suggestions
- Personalized offers
- Faster checkout flow

Expected Impact

- Increase Average Order Value
- Improve cart conversion
- Reduce cart abandonment
- Enhance shopping experience

Key Takeaway

An intelligent product and cart experience encourages customers to discover complementary products, build larger baskets, and complete purchases with minimal friction.

Product Roadmap

Phased implementation for sustainable growth

Phase 1 (0–3 Months) – MVP

- AI Personalized Home Feed
- Smart Bundles & FBT
- Free Delivery Progress Bar

Phase 2 (3–6 Months) – Growth

- Pantry Refill Reminders
- One-Tap Reorder
- Dynamic Cart Recommendations

Phase 3 (6–12 Months) – Scale

- Loyalty & Rewards Program
- Gamification & Shopping Streaks
- Predictive AI Shopping Assistant

Goal

Deliver quick wins first, then build long-term customer engagement and loyalty through advanced personalization.

Key Takeaway

A phased roadmap ensures faster delivery of high-impact features while minimizing implementation risk and continuously improving the customer experience.

Success Metrics

Measuring the impact of the proposed product improvements

Business Metrics

- Customer Retention Rate
- Average Order Value (AOV)
- Customer Lifetime Value (CLV)

Engagement Metrics

- Repeat Purchase Rate
- Cart Conversion Rate
- Product Discovery Rate

Customer Experience Metrics

- Checkout Completion Rate
- Net Promoter Score (NPS)
- Average Order Completion Time

Metric	Current	Target
Customer Retention	45%	60%+
Average Order Value	₹460	₹550+
Repeat Purchase Rate	35%	50%+
Cart Conversion Rate	68%	80%+

Key Takeaway

Tracking these metrics ensures Blinkit can continuously optimize user engagement, increase basket size, and improve long-term customer loyalty.

Expected Business Impact

Projected outcomes after implementing the proposed growth strategy

blinkit
India's Last Minute App

1 CUSTOMER GROWTH

- Retention: 45% → 60%+
- Repeat Purchases: +20%
- Customer Lifetime Value: Increased

2 REVENUE GROWTH

- Average Order Value: ₹460 → ₹550+
- Higher Basket Size through smart bundles
- Increased Revenue per Customer

3 PRODUCT PERFORMANCE

- Better Product Discovery
- Higher Cart Conversion
- Reduced Cart Abandonment
- Improved Checkout Experience

4 CUSTOMER EXPERIENCE

- Personalized shopping journey
- Faster product discovery
- Greater customer satisfaction
- Stronger brand loyalty

EXPECTED KPIs

METRIC	CURRENT	TARGET	IMPACT
Customer Retention	45%	60%+	Stronger customer base & long-term loyalty
Average Order Value	₹460	₹550+	Higher revenue per order
Cart Conversion	68%	80%+	More orders converted
Repeat Purchases	35%	50%+	Increased engagement & repeat orders

ADDITIONAL BENEFITS

- Improved customer satisfaction (NPS ↑)
- Stronger competitive advantage
- Better inventory planning with demand predictions
- Optimized marketing spend through personalization

KEY TAKEAWAY

By combining AI-powered personalization, smart bundling, and a seamless purchase experience, Blinkit can improve customer retention, increase average order value, and strengthen its competitive position in India's quick-commerce market.
