LIFE BEFORE BUY AGAIN

Before the Buy Again feature, users had to search for each grocery item manually and rebuild their cart every time they shopped.

Key User Challenges

- Repeated searching for the same products
- Time-consuming cart creation
- Higher chances of forgetting essentials
- Frustrating weekly grocery replenishment

User Behaviour

Most users purchased similar groceries every week but had no quick way to repeat previous orders.

THE PROBLEM

Impact on Users

- Increased shopping time
- Higher cognitive effort
- Repetitive user actions
- Poor repeat shopping experience

Impact on Business
