PROFESSIONAL SUMMARY

Product-focused technology professional with 5 years of experience across enterprise CRM platforms, business-process automation, data transformation, workflow optimization, and cross-functional technology delivery. Experienced in translating business requirements into scalable product and platform solutions, defining user requirements, supporting prioritization, coordinating UAT, managing releases, and measuring business outcomes. Hands-on experience across Salesforce, enterprise SaaS/CRM environments, order-processing workflows, inventory operations, automation, and large-scale data migration. Currently strengthening formal Product Management expertise through an AI Product Management Fellowship at Product Space, with hands-on work across product discovery, PRDs, product analytics, AI products, experimentation, and product growth.

PRODUCT MANAGEMENT EXPERIENCE

PRODUCT SPACE | AI PRODUCT MANAGEMENT FELLOWSHIP

Product Management Intern / AI Product Management Fellow | Jun 2026 – Present

- Work on end-to-end Product Management exercises covering product discovery, problem definition, user research, JTBD, customer journeys, opportunity identification, PRDs, prioritization, product analytics, experimentation, and product growth.
- Develop product requirements and solution concepts for AI-powered products, translating user problems into product opportunities, features, user stories, and measurable outcomes.
- Create PRDs, product strategy artifacts, success metrics, prioritization frameworks, and product improvement plans as part of hands-on product assignments.
- Apply AI product concepts including LLM-powered experiences, prompt engineering, Agentic AI, RAG, and AI product workflows to product design and improvement.
- Apply a structured product-development approach across problem discovery → solution definition → prioritization → execution planning → measurement.

PROFESSIONAL EXPERIENCE

MAGNA TECHNOLOGY GROUP | Salesforce Developer

Sep 2025 – Aug 2026

MITER Brands — Salesforce Platform, Data Migration & Business Process Transformation

- Translated business and operational requirements into enterprise CRM platform capabilities, working across stakeholders, technical teams, UAT, deployment, and post-production support.
- Supported migration and validation of **2.5M+ Salesforce records**, coordinating data transformation, quality checks, issue investigation, and validation activities.
- Analyzed business-process problems and designed workflow automation using **Apex, Flows, SOQL, LWC, and Salesforce configuration**.
- Coordinated UAT, defect resolution, release activities, deployment, and production stabilization across implementation cycles.
- Investigated complex production and implementation issues using root-cause analysis and data-driven troubleshooting.

Capital Brands — CRM Product Enhancements & Process Automation

- Delivered CRM enhancements for business-critical sales, service, and operational workflows by translating business requirements into scalable platform solutions.
- Optimized lead-management workflows through automated routing, contributing to a **30% improvement in lead-to-opportunity conversion**.
- Automated commission-processing workflows, reducing processing time by **50%**.
- Enhanced case-management workflows across Email-to-Case, Live Chat, and Omni-Channel, contributing to a **40% improvement in case-resolution time**.
- Partnered with business users during requirements clarification, UAT, defect resolution, release coordination, and production support.

TARA CLOUD | Salesforce Developer

Oct 2021 – Aug 2025

Key Realty — Sales & Service Cloud Platform

- Translated business-process requirements into Salesforce platform capabilities across Sales Cloud and Service Cloud, working through requirements, development, testing, UAT, deployment, and production support.
- Implemented CRM automation across lead, opportunity, commission, and case-management workflows, improving operational efficiency.
- Delivered measurable outcomes including **30% higher lead-to-opportunity conversion, 50% faster commission processing, and 40% faster case resolution**.
- Developed scalable user interfaces and data solutions using **LWC, SOQL, Apex, and Salesforce platform capabilities**.

Vishal Bearings — Order Processing, Warehouse Operations & Inventory

- Worked with business requirements across warehouse operations, order processing, inventory management, and CRM workflows.
- Implemented automated opportunity and order-processing workflows, contributing to a **40% reduction in order-processing time**.
- Supported real-time inventory updates and operational reporting to improve process visibility and decision-making.
- Participated in requirements analysis, UAT, debugging, deployment, and production issue resolution.

SELECTED PRODUCT PROJECT

AI-POWERED FINANCIAL HEALTH ASSISTANT | Product Management Project

- Defined the problem of proactively identifying financial stress and changing user financial behavior within a digital banking experience.
- Applied personas, JTBD, customer journey mapping, and opportunity identification to frame the problem and solution space.
- Developed a detailed Product Requirements Document (PRD) covering product vision, user problems, requirements, user stories, and success metrics.
- Created an **Opportunity Solution Tree** connecting user problems with potential opportunities and solutions.
- Defined product success metrics and prioritization criteria to evaluate proposed features.
- Designed an AI-assisted experience focused on **proactive financial insights, personalized recommendations, and user engagement**.

CORE PRODUCT & BUSINESS SKILLS

Product Management: Product Discovery | Product Strategy | PRDs | Requirements Gathering | User Stories | Acceptance Criteria | JTBD | Customer Journey Mapping | Opportunity Solution Trees | Prioritization | Product Metrics | Product Analytics | Product Improvement | Agile/Scrum

Delivery: Backlog Refinement | UAT | Release Management | Stakeholder Management | Cross-functional Collaboration | Defect Management | Process Improvement | Root-Cause Analysis

Domain: Enterprise SaaS | CRM Platforms | Sales & Service Operations | Order Processing | Inventory Management | Workflow Automation | Data Migration | Business Process Transformation
